VEERA VISHNU VARDHAN REDDY DWARSALA **Mobile No +91-7013596058**
.NET Developer & SQL Developer **Email : reddy.vishnu1971@gmail.com**

SKILLS SUMMARY

- Around 3 years of experience in the IT Industry as a .NET Developer and SQL Developer.
- Experienced in developing scalable RESTful APIs using ASP.NET Core Web API, C#, and Entity Framework Core.
- Proficient in designing, developing, and maintaining enterprise applications including Employee Management System (EMS), Inventory Management System (IMS), and Candidate Relationship Management (CRM).
- Strong knowledge of C#, SQL, MySQL, and relational database design.
- Experienced in implementing CRUD operations, API integration, authentication, and authorization mechanisms.
- Hands-on experience in designing database schemas, managing relationships, and maintaining data integrity using primary and foreign key constraints.
- Skilled in writing optimized SQL queries, joins, stored procedures, indexing, and query performance tuning.
- Experience in developing secure applications using JWT Authentication and Role-Based Access Control.
- Proficient in debugging backend applications, troubleshooting production issues, and resolving database-related problems.
- Experienced in API testing and documentation using Swagger and Postman.
- Worked on application deployment, environment configuration, and API hosting using ngrok.
- Strong understanding of Software Development Life Cycle (SDLC), backend development best practices, and performance optimization.
-

QUALIFICATION

DEGREE	UNIVERSITY	COLLEGE/SCHOOL	YEAR OF PASSING
SCC	STATE BOARD	GOPI KRISHNA HIGH SCHOOL	2016
INTERMEDIATE	BOARD OF INTERMEDIATE	NARAYANA JUNIOR COLLEGE	2016 - 2018
B. TECH	HINDUSTAN UNIVERSITY	HINDUSTAN INSTITUTE OF TECHNOLOGY & SCIENCE	2018 - 2022

TECHNICAL SKILLS

Technologies : ASP.NET Core Web API, REST APIs, JWT Authentication, CRUD Operations

Languages : C#, SQL

Database : MySQL

Tools : Visual Studio, MySQL Workbench, Swagger, ngrok

Concepts : CRUD Operations, API Integration, Database Design, Authentication & Authorization, Query Optimization, Performance Tuning, Debugging, Exception Handling

PROFESSIONAL AFFILIATION

● Working as an Associate Software Engineer (.NET Developer & SQL Developer) with PIRNAV SOFTWARE SOLUTIONS from February 2023 to Present.

PROJECT SUMMARY

PROJECT 1: EMPLOYEE MANAGEMENT SYSTEM (EMS)

Employee Management System (EMS) is a web-based application developed to manage employee information, attendance, leave management, payroll processing, employee documents, assets, tasks, and administrative operations efficiently. The system helps organizations streamline HR processes, improve employee record management, and generate operational reports.

ROLE
.NET Developer & SQL Developer

DURATION
March 2023 - December 2025

ENVIRONMENT
ASP.NET Core Web API, C#, Entity Framework Core, MySQL, Swagger, JWT Authentication, ngrok

ROLES & RESPONSIBILITIES:

- Developed and maintained RESTful APIs using ASP.NET Core Web API.
- Designed and managed MySQL database tables, relationships, constraints, and indexes.
- Implemented Employee Management, Attendance Management, Leave Management, Payroll, Asset Management, and Employee Document modules.
- Developed Attendance Filtering, Late Entry Tracking, Auto Check-In/Check-Out, and Attendance Reporting functionalities.
- Created Salary Register, PF Reports, Leave Balance Reports, and Attendance Reports.

• Implemented CRUD operations for multiple business modules and administrative functions.

• Developed JWT-based Authentication and Role-Based Authorization mechanisms.

• Optimized SQL queries, joins, and stored procedures to improve application performance.

• Ensured data integrity through proper implementation of primary keys, foreign keys, constraints, and validations.

• Integrated frontend modules with backend APIs and resolved API integration issues.

• Performed API testing, validation, and documentation using Swagger and Postman.

• Participated in debugging, troubleshooting, deployment support, and production issue resolution.

• Worked closely with team members during requirement analysis, development, testing, and maintenance phases.

PROJECT 2: INVENTORY MANAGEMENT SYSTEM (IMS)

Inventory Management System (IMS) is a web-based application developed to manage products, warehouses, suppliers, customers, stock movements, and purchase transactions. The system helps organizations maintain inventory accuracy, monitor stock levels, and streamline warehouse operations.

ROLE
.NET Developer & SQL Developer

DURATION
January 2025 – June 2025

ENVIRONMENT
ASP.NET Core Web API, C#, Entity Framework Core, MySQL, Swagger, JWT Authentication, ngrok

ROLES & RESPONSIBILITIES:

• Developed RESTful APIs for Product, Warehouse, Supplier, and Customer Management modules.

• Designed and managed MySQL database tables, relationships, and constraints for inventory operations.

• Implemented Product Management and Inventory Tracking functionalities.

• Developed Stock Movement and Warehouse Management modules.

• Created CRUD operations for inventory-related business processes.

• Implemented Supplier and Purchase Management functionalities.

• Optimized SQL queries and database operations for improved system performance.

• Integrated frontend modules with backend APIs.

• Tested APIs using Swagger and Postman.

• Worked on debugging backend applications and resolving database-related issues.

• Maintained data integrity using primary keys, foreign keys, constraints, and validations.

• Participated in application maintenance, testing, and deployment support activities.

PROJECT 3: CANDIDATE RELATIONSHIP MANAGEMENT (CRM)

Candidate Relationship Management (CRM) is a recruitment and talent acquisition platform developed to manage candidate profiles, job applications, interview scheduling, recruiter interactions, onboarding processes, and communication tracking. The system helps streamline recruitment activities and improve candidate engagement throughout the hiring lifecycle.

ROLE
.NET Developer & SQL Developer

DURATION
January 2026 – Present

ENVIRONMENT
ASP.NET Core Web API, C#, Entity Framework Core, MySQL, Swagger, JWT Authentication, ngrok

ROLES & RESPONSIBILITIES:

- Developed and maintained RESTful APIs using ASP.NET Core Web API.
- Implemented Login, Registration, Forgot Password, OTP Verification, and Reset Password functionalities.
- Developed JWT-based Authentication and Authorization mechanisms.
- Designed and managed MySQL database tables for candidate and user management modules.
- Implemented Candidate Registration and Profile Management functionalities.
- Developed APIs for recruiter and candidate interactions.
- Integrated Email OTP Verification for secure account validation.
- Performed API testing and documentation using Swagger and Postman.
- Optimized SQL queries and database operations for improved application performance.
- Integrated frontend applications with backend APIs.
- Worked on debugging backend applications and resolving database-related issues.
- Participated in deployment support, testing, and application maintenance activities.
