PIRNAV’S SECURITY/ LEGAL POLICY

Pirnav Software Solutions Pvt Ltd is a digital transformation and technology partner of choice for industry-leading organizations. Since its inception in 2016, Pirnav Software Solutions Pvt Ltd has upheld the highest standards of innovation, engineering excellence and customer service. As part of its operations, Pirnav Software Solutions Pvt Ltd has access to business-sensitive information (including personal information), the protection of which is crucial to Pirnav Software Solutions Pvt Ltd and its client's business interests.

Our Security Vision is “**To make Pirnav Software Solutions Pvt Ltd reliable, resilient and immune to the existing and evolving volatile environment of constant changes, accidents, attacks and failures.**”

This Security Policy reiterates our commitment to protect all the information and assets that we own or are responsible for; thus, ensuring an efficient, safe and secure working environment for Pirnav Software Solutions Pvt Ltd and its customers.

Pirnav Software Solutions Pvt Ltd will deploy a convergent security model to ensure:

- Protection of information and assets against existing and emerging threats by deploying adequate security controls covering physical, logical, personnel and information security (including cyber security)
- Secure deployment of emerging technologies like Artificial Intelligence, Blockchain, Quantum, etc.
- Compliance to legal and statutory / regulatory requirements across its global operations
- Continuity of operations in line with business requirements and obligations to its stakeholders
- Inclusion of security responsibilities of various departments / individuals to adhere to this Policy
- Adequate security awareness and competence among associates at all levels to fulfill these responsibilities
- Avenues for associates and other stakeholders to report security weaknesses, violations or disruption of services
- Robust framework to Identify security weakness, protect against their exploitation, Detect and Respond to violations and Recover from any disruption of services
- Governance of security performance against appropriate targets and objectives, enabling continuous improvements
- Third party / Supply Chain risk management (including their personnel)

This Policy will be supported by Standards, Procedures and Guidelines (Security Management System) and will be made available to all stakeholders who are expected to contribute towards the effective implementation and deployment of these security norms.

An independent security organization, led by the Chief Information Security Officer (CISO), will be responsible for the Security Management System. The Security

Management System will be periodically reviewed to ensure its continuing applicability and relevance to our operations and evolving stakeholder expectations.

This Policy will extend to Pirnav Software Solutions Pvt Ltd globally and its wholly owned subsidiaries in all geographies, and will be applicable to all its associates, business associates and external parties having access and usage rights to its infrastructure, IT systems and/or Information resources. Consequences arising out of violations or contravention to any of the objectives of this Policy will be equally applicable to all associates of Pirnav Software Solutions Pvt Ltd and its wholly owned subsidiaries globally and external parties.
